## Request for Proposals

### Request for Proposals El Dorado County Air Quality Management District Motor Vehicle Emissions Reduction Electric Vehicle Charging Station Projects 2019

The El Dorado County Air Quality Management District (AQMD) is pleased to announce the release of a Request for Proposals (RFP) for electric vehicle charging stations (EVCS). EVCS can draw additional customers to your business. These stations will be funded in part with DMV AB 2766 Motor Vehicle Emissions Reductions revenue. Approximately \$100,000 is anticipated to be available for projects at up to \$5,000 per charger. Matching funds must be provided in the form of grantee-provided electricity, designation of parking spaces, and availability for public use. The deadline to submit applications is Friday, **April 26, 2019** at 4 PM.

El Dorado County exceeds the National Ambient Air Quality Standards (NAAQS) for ozone and small particulate matter (PM2.5). Ozone is formed by reaction of organic gases (ROG) and nitrogen oxides (NOx) in the presence of sunlight. NOx is also contributes to the formation of PM2.5. All three pollutants are found in motor vehicle emissions. AQMD's goal in this RFP process is to identify projects that provide significant motor vehicle emission reductions at the lowest cost per ton of emissions reduced. This grant is intended to subsidize emissions reduction projects, not supplant existing normal operating expenses.

The complete RFP packet, Application, and information on previously funded projects, can be viewed under the “*Electric Vehicle Supply Equipment (EVSE) Request for Proposals*” section on the AQMD's Grants and Incentives site at: [www.EDCCleanAir.org](http://www.EDCCleanAir.org)

THANK YOU FOR WORKING WITH US TO IMPROVE AIR QUALITY
