Woodsmoke Reduction Program

Air District: El Dorado County Air Quality Management District

Community: N/A

Community Emissions Reduction Program Measure: N/A

Project Plan Identifier: 2022-04SSP-ED

Project Type: Stationary Source Emission Reductions

Project Plan Completion Date: December 3, 2022

CARB Action (Date): Approved; January 13, 2022

Project Description: The purpose of the Woodsmoke Reduction Program is to promote the voluntary replacement of old, uncertified, wood-burning home heating devices with cleaner and more efficient alternatives.

Project Benefits: The Program will reduce fine particulate (PM2.5), black carbon, and toxic air contaminant emissions from Households currently using uncertified wood stoves, wood inserts, or fireplaces as a primary heat source. The project will achieve this by increasing access to incentive funding while providing rebates up to 100 percent of the cost of a new EPA phase II certified wood heater when replacing an existing uncertified model.
