

12. Crime

Crime rate statistics include information on crimes reported, staffing of the criminal justice system, and numbers incarcerated or on probation. Interpretation of crime statistics is difficult as they may be indicative of any number of local conditions and attitudes, both negative and positive. An above average rate of reported crime in an area can be a direct reflection of social problems in a community. It can also indicate a greater willingness within the community to report crime, perhaps due to a more cooperative relationship between local law enforcement and the general citizenry. The adequacy of local law enforcement resources is generally reflected, not in rates of reported crime, but rather in the conviction rate. Incarceration rates relative to serious crimes reported may be an indicator of the effectiveness of local prosecution, including whether sufficient resources are allocated to local police and prosecutors. While it is reported that more than 25 million Americans are victims of crime each year, the Bureau of Justice Statistics states, based on the National Crime Victimization Survey, that violent crime rates have declined from 51,200 in 1994 to 22,300 in 2003, the lowest rate ever recorded.

Reported Crime & Crime Rates

Overview

Crime counts are a summation of crimes reported to local law enforcement agencies. They include misdemeanor and felony reports, but not infractions such as traffic violations. Reported crimes are counted whether or not the criminal is apprehended or identified.

The crime rate is the number of crimes committed per 100,000 people, and includes both violent and property crimes.

Crime rate data can be used to determine whether the amount of crime in a given area is increasing or decreasing, and also to show how crime rates from various areas compare to each other. Safety is an important factor for people deciding where to move; an area with a high crime rate is a much less attractive place to live than one with a low crime rate. While it is often difficult to predict when or where a crime will be committed, individuals and communities can help with prevention by taking note of patterns and trends collected by legitimate agencies.

Crime rates could rise and fall with increasing or

decreasing incidence of crime, but rates could also change if more or fewer crimes are reported to local law enforcement agencies. Therefore, careful analysis is needed when evaluating change in crime rates.

According to the Bureau of Justice, for the year 2003, overall violent crimes in the U.S. were more likely to occur during the day than at night; some crimes exhibited different patterns. Fifty-three percent of violent crimes occurred between 6 a.m. and 6 p.m. Almost 66 percent of rapes and sexual assaults occurred at night between 6 p.m. and 6 a.m. In 2003, approximately 25 percent of violent crimes occurred at or near the victim's home. Common locales for violent crimes were on streets other than those near the victim's home (17 percent), at school (14 percent), or at a commercial establishment (7 percent). Urban residents had the highest violent victimization rates, followed by suburban resident rates. Rural residents had the lowest rates. The crime rate in Northern California is typically lower than in Southern California, due in part to lower population density in the northern counties.

Property crime makes up about 75 percent of all crime in the United States. Overall, in about 83 percent of all burglaries, the offender gained entry into the victim's residence or other building on the property. Approximately 74 percent of all attempted motor vehicle thefts were completed. Property crime, regardless of the type, occurred more often to those living in rented property. In 2003, the western portion of the U.S. experienced the highest rates of property crime overall in the nation.

NOTE: CCI stands for the California Crime Index.

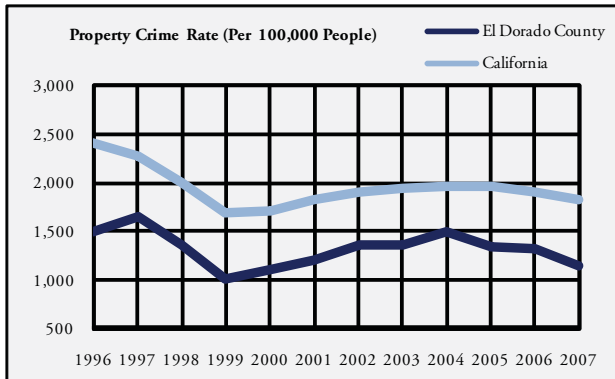

El Dorado County

There were 2,029 property crimes and 471

Reported Crimes

Year	Property Crimes				Violent Crimes				
	Burglary	Motor-vehicle theft	Larceny over \$400	Total	Homicide	Forcible rape	Robbery	Aggravated assault	Total

Criminal Justice Personnel

Overview

Criminal justice personnel includes the law enforcement employees working in the different agencies as reported by the California Department of Justice. The following types of criminal justice personnel are shown:

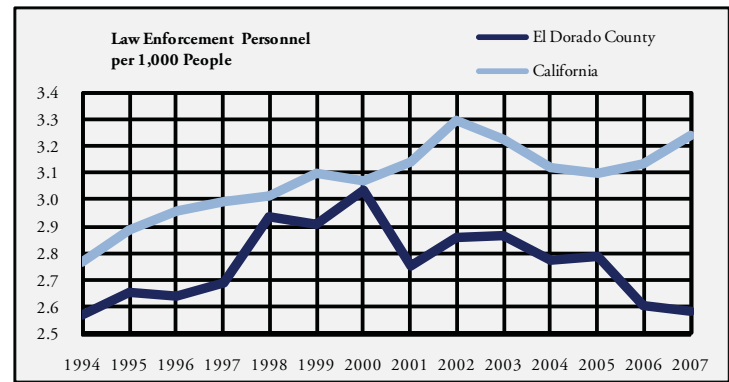

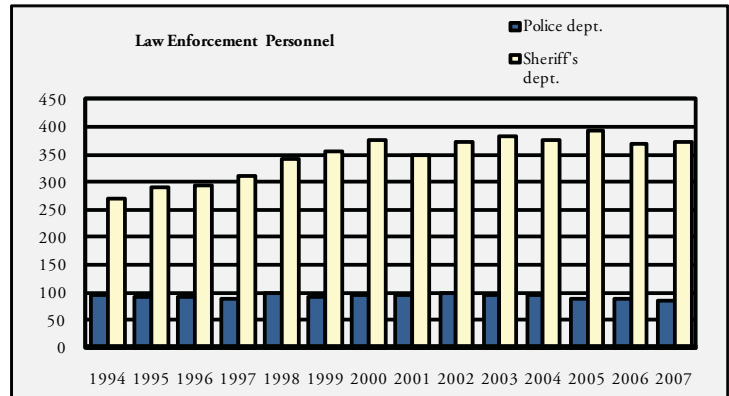

Law enforcement or sworn officers and civilian employees in local law enforcement agencies, including city police and county sheriff's departments

Prosecution or personnel involved in the prosecution of the accused

Public defense or personnel primarily responsible for representing those unable to hire a private lawyer

Trial courts or primary and auxiliary judges employed during trials

NOTE: The California Department of Justice relies on local agencies to report the number of criminal justice

Criminal Justice Personnel

personnel in their area every year.

Criminal justice personnel information helps identify the types of criminal justice employment within a county. Counties with higher incidence of crime need greater numbers of criminal justice personnel to handle the caseload. If crime is rising and the number of criminal justice personnel is not keeping pace, then local personnel are likely handling greater workloads.

El Dorado County

The total number of criminal justice personnel in El Dorado County remained relatively the same between 2006 and 2007. There was an increase of four sheriff's department personnel in the same year. In the state of California, the total number of law enforcement personnel increased from 218,023 in 2006 to 218,023 in 2007, according to the California Department of Justice.

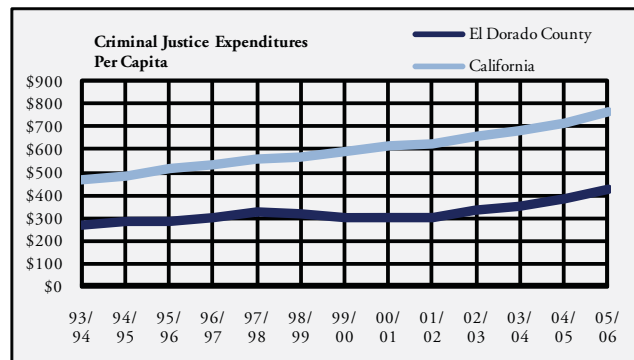

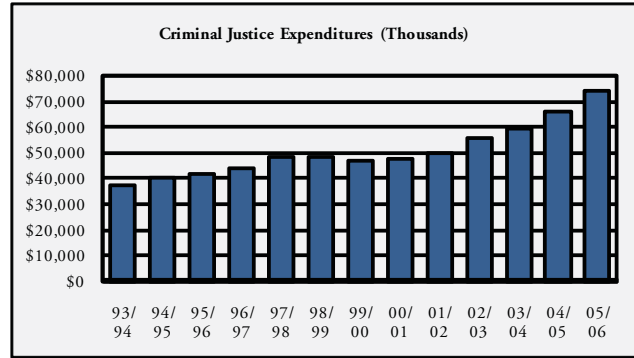

Crime Expenditures

Overview

Criminal justice expenditures include the amount of money spent by a county in a fiscal year, according to the California Department of Justice. These expenses include employee salaries and benefits, as well as services and supplies. Capital expenditures (expenditures made to acquire, add to, or improve property, plant, and equipment) and construction and maintenance of structures are not included in the data.

NOTE: The California Department of Justice relies on local agencies to report the number of criminal justice personnel in their area every year. Local government expenditure reports may show different spending patterns on criminal justice line items, which usually include capital expenditures. The data reported to the department should include some expenditures entered in administrative line items, as well.

Expenditures for criminal justice programs in a county measure the amount of money allocated to local law enforcement each year. However, that statistic is

somewhat ambiguous because high expenditures may imply a local problem with crime or a budgetary priority for prevention or prosecution of crimes.

Criminal Justice Expenditures (Thousands)

Year	Law	Judicial Expenditures	Custody/	Prosecution	Public defense	Grand total
	Enforcement Expenditures		Supervision Expenditures			
93/94	\$ 16,523	\$ 6,005	\$ 8,992	\$ 5,283	\$ 955	\$ 37,758

Source: California Department of Justice

El Dorado County

In FY05, over \$74.3 million was spent in criminal justice expenditures in El Dorado County, and those expenditures have increased over \$32.8 million since FY95. Between FY95 and FY05, public defense expenditures increased the most, with a 127 percent increase. This increase in expenditures was followed by custody/supervision expenditures (115 percent) and law enforcement expenditures (112 percent). Judicial expenditures (-13 percent) experienced a decrease over the same time period.

Probation Caseload

Overview

Probation allows people who have been convicted of a minor crime to serve time outside criminal justice facilities, performing various duties such as trash collection, park cleanup, and landscape maintenance of the surrounding community.

The data here includes adults on active probation as of December 31 of each year. As of 1998, caseload labels were changed from superior courts and lower courts to felony offense and misdemeanor offense due to court consolidations. Counties that have consolidated their courts report only felony offenses.

Significant probation caseloads in a county can be indicative of minor criminal activity within the community, a criminal justice system that relies on community-based rehabilitation programs, or any number of additional factors.

El Dorado County

There were a total of 1,584 probation cases in El

Dorado County in 2007, with 1,306 cases related to felony offenses (an decrease of 188 from the previous year) and 278 related to misdemeanors (an increase of 94 from the previous year). Between 1995 and 2002, the number of probation cases for misdemeanor offenses was higher than the number of felony cases.

County Probation Caseload

Year	Felony Offense	Misdemeanor Offense	Total
1994	486	349	835
1995	428	488	916
1996	318	537	855
1997	262	555	817
1998	409	561	970
1999	552	568	1,120
2000	541	562	1,103
2001	506	597	1,103
2002	613	706	1,319
2003	820	768	1,588

Jailed Population

Overview

This is the total number of people housed temporarily in the county jail. It includes persons waiting for trial, those on trial, and those who are convicted and either serving short-term sentences or waiting relocation to a correctional facility.

Local detention facilities include Types II through IV. Type I data was not included in the figures because so few of these facilities exist in Northern California. However, a definition of a Type I facility is included below for your information.

A Type I facility is a local detention facility used to detain persons for less than ninety-six hours, excluding holidays, after booking. Such a facility may also detain persons on court order, persons sentenced to a city jail as an inmate worker, inmate workers sentenced to the county jail, provided such placement in the facility is made on a voluntary basis on the part of the inmate.

A Type II facility is a local detention facility used for detaining persons pending arraignment, after arraignment, during trial, and commitment upon sentencing.

A Type III facility is a local detention facility used only for detaining convicted and sentenced persons.

A Type IV facility is a local detention facility designated for housing inmates who are eligible, under Penal Code Section 1208, for work and education furlough or other programs involving inmate access to the community.

NOTE: Persons in jail are included in the total population of the county (section one), whether or not they were permanent residents of the county before being arrested. For example, in 2006, the total population in El Dorado County was 175,530, including incarcerated persons.

Data on the average number of adults populating local jails provides another way of determining the amount of crime in an area, the effectiveness of local prosecution, and how much of the area's resources are used to provide detainment.

El Dorado County

As of 2006, 371 people were incarcerated in El Dorado County. Of those sentenced, 137 were males and 25 were females. Of those not sentenced, 182 were males and 27 were females. Collectively, the incarcerated population in El Dorado County made up 0.21 percent of the county's total population in 2006.

Average Daily Jail Population (Type II, III & IV Facilities)

	Sentenced		Non-Sentenced		Total incarcerated population	Percent of population incarcerated
	Male	Female	Male	Female		
1994	116	15	128	20	279	0.2 %
1995	158	19	89	12	278	0.2 %
1996	188	17	69	7	281	0.2 %
1997	184	23	94	12	313	0.2 %
1998	164	21	123	15	323	0.2 %
1999	146	21	120	15	302	0.2 %
2000	135	26	109	12	282	0.2 %
2001	104	21	117	14	256	0.2 %
2002	132	24	131	15	302	0.2 %
2003	141	20	144	18	323	0.2 %
2004	139	22	128	20	309	0.2 %
2005	141	33	136	19	329	0.2 %
2006	137	25	182	27	371	0.2 %
