We have received some additional suggestions since the May 28 and June 11, 2009 Planning Commission Hearings and have now placed updated drafts of these documents on the County's DOT website.

The County's original Design and Improvement Standards Manual (DISM) has been updated and reconfigured into three manuals:

[\(1\) Land Development Manual \(LDM\)](#)

[\(2\) Highway Design Manual \(HDM\)](#)

[\(3\) Standard Plans.](#)

Standard Plans for road cross-sections were prioritized ahead of the rest because they were most in need of updating.

Staff will return to the July 23, 2009 Planning Commission Hearing to request that the Commission approve of the LDM, HDM and Standard Plans for road cross-sections; and recommend them to the Board for adoption.

You may provide suggestions to staff ahead of the July 23rd Planning Commission Hearing, or during that Hearing:
