Subject Greenwood ( Georgetown KH project)

Gina,  
We would like to request that we be given some time to change the noise mitigation requirements in the noise portion of our SUP. We understand that this will cause our project to be continued. We do not wish for our project to be delayed but feel these changes are necessary for us to make. We understand it will be at least 30 days but we are hoping for no more than 60 days. Thank you for your understanding and flexibility in this matter.
